

Unlock Your Move:

Tailored Classes for Every Moment

 **lululemon**

Lululemons Communtiy Initiative

Lululemon has fostered a loyal fitness community through free yoga classes, wellness workshops, and run clubs, all of which have played a big role in the brand's success.

The Challenge!

How can we leverage the Lululemon app to understand, personalize, and scale community engagement to create meaningful, loyalty-building wellness experiences?

it's so much more than apparel; it's about people.

Our Solution: Personalized Class Recommendations

1

Users take a fun personality quiz and receive a 10% discount for completing it.

2

Responses, along with profile and purchase history, are combined to build a rich user dataset.

3

Upon completion, a personalized class recommendation feature is unlocked, offering tailored suggestions, reminders, and follow-ups.

4

Lululemon can seamlessly promote relevant products within these classes and gather feedback to further refine experiences.

We help users discover classes they love, connect with community, and stay motivated.

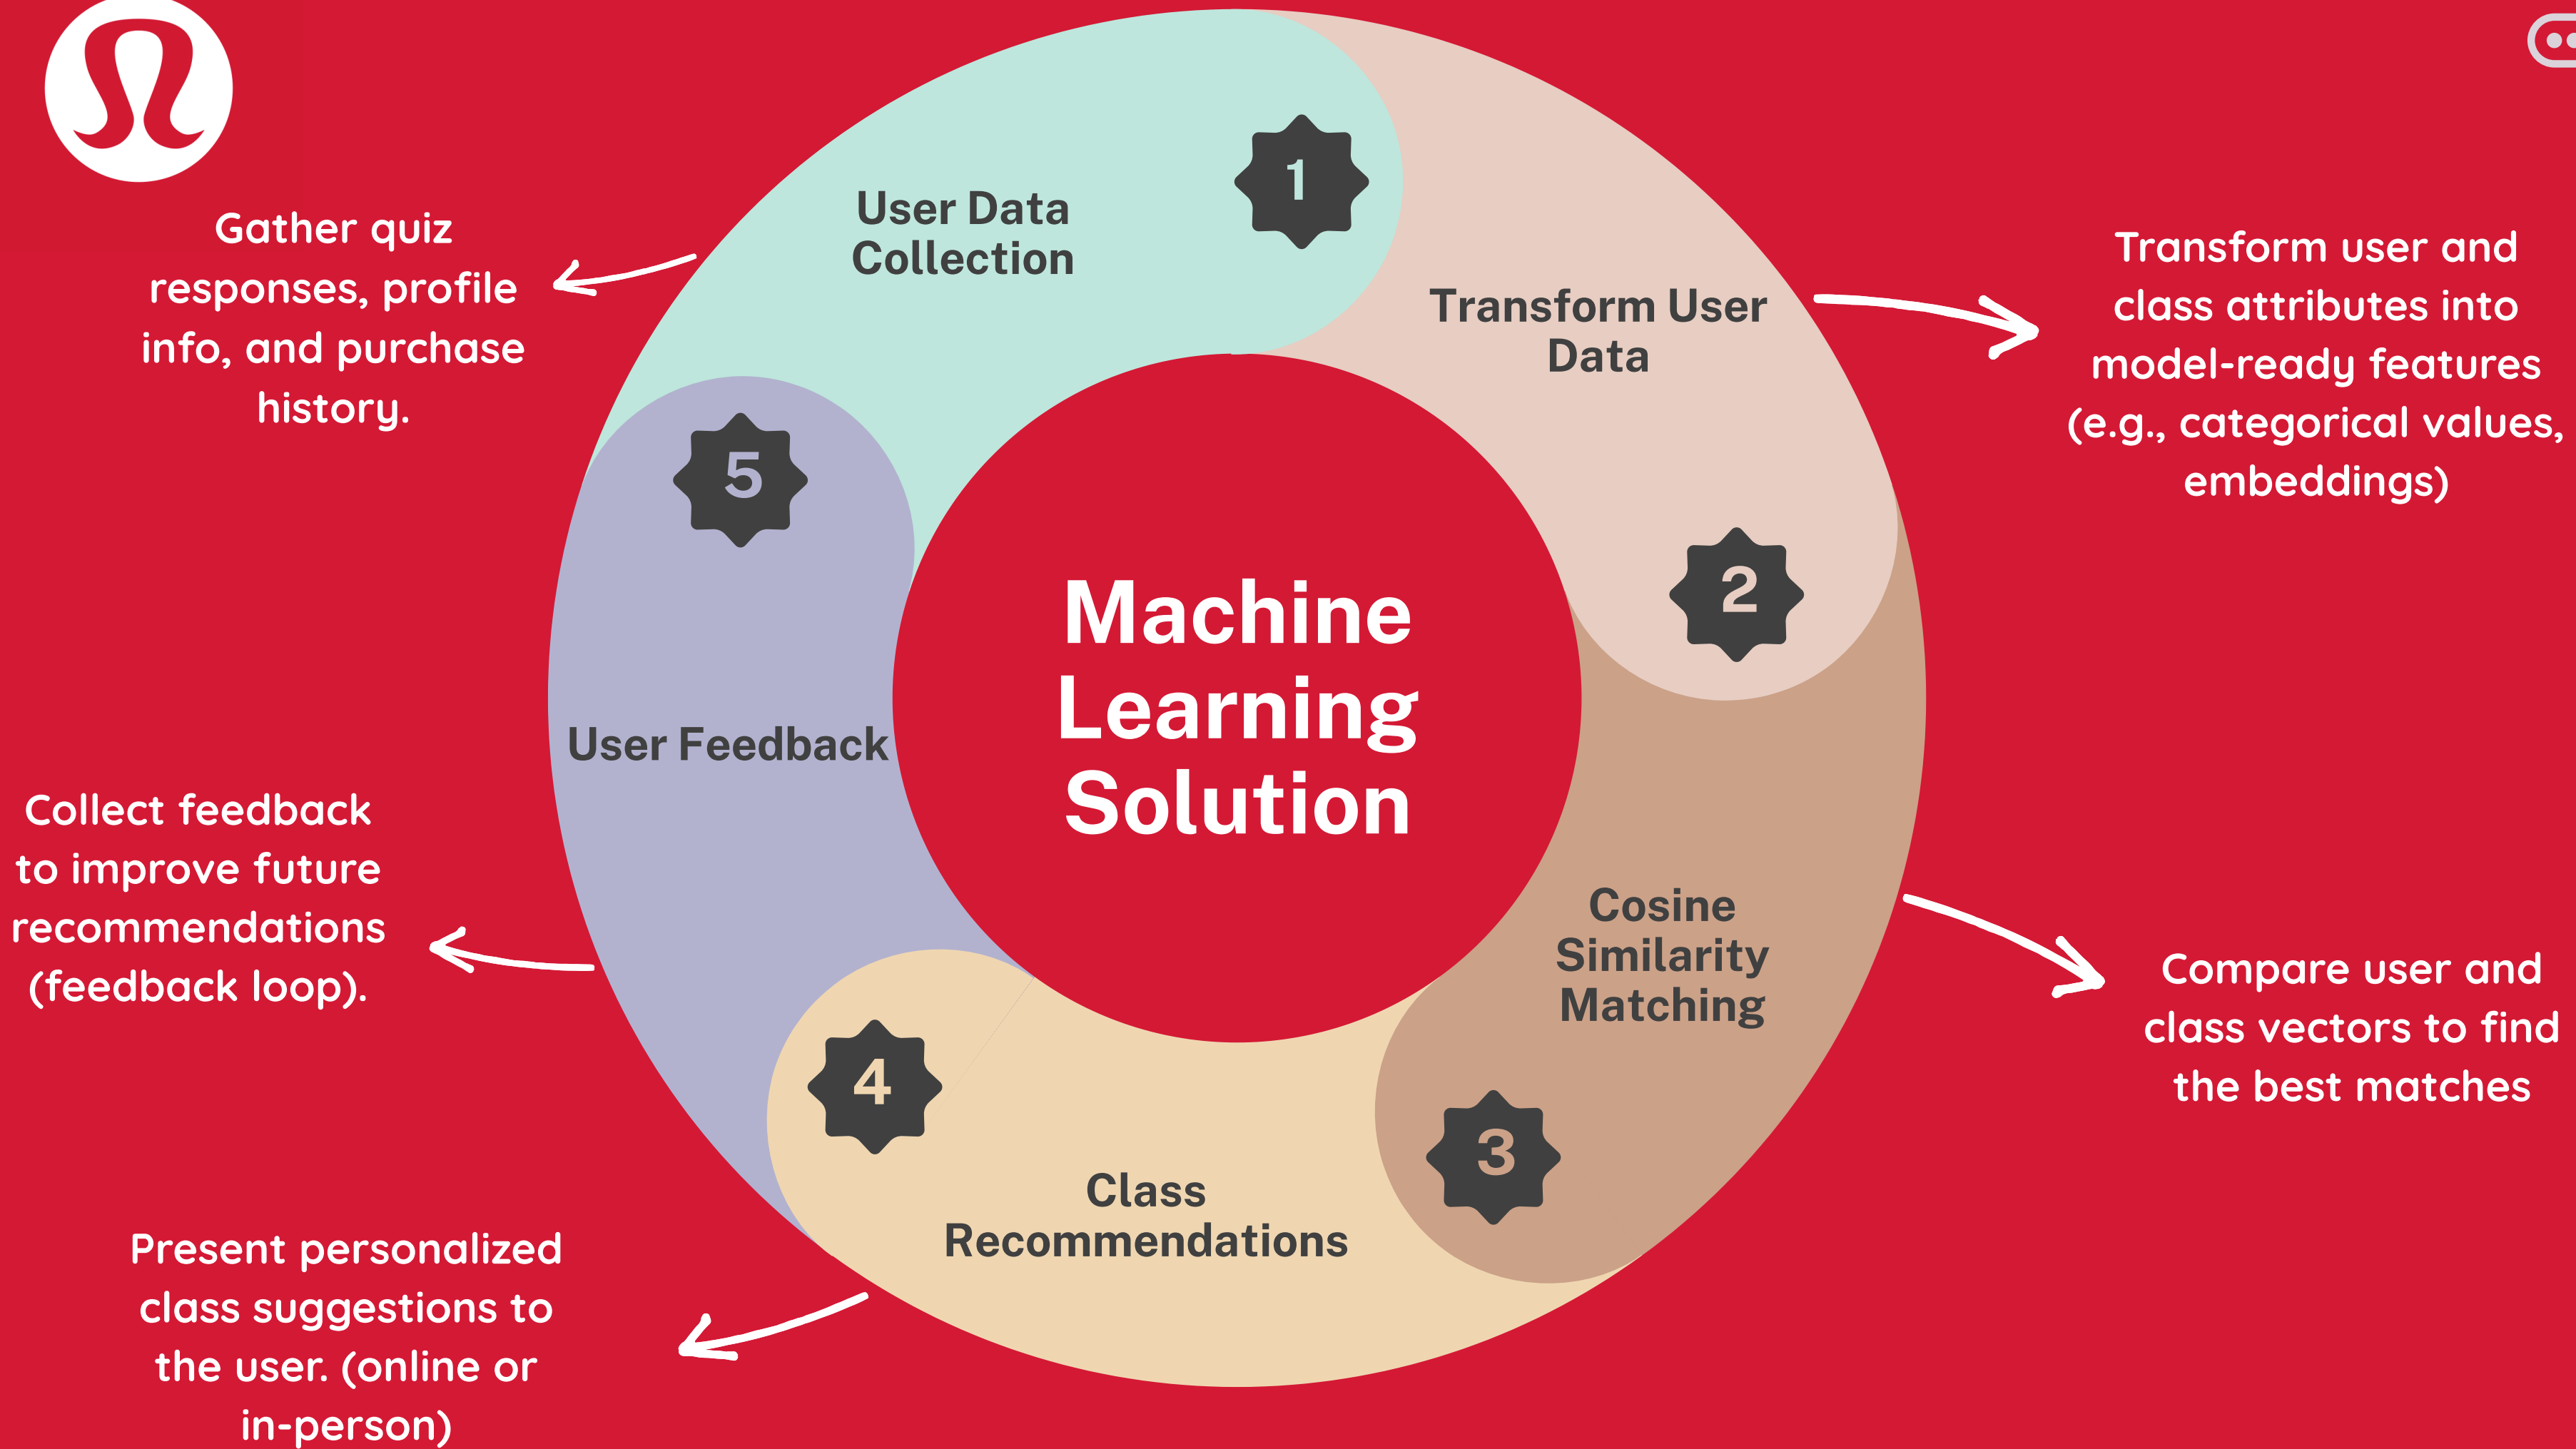

Features in the Dataset

What We Will Know About Our Users:

- 🎂 **Age**
- 📍 **Location:** Tailoring experiences by region
- 👤 **Gender**
- 🛒 **Purchase History:** Tracking favorites and trends
- 🎯 **Wellness Goals:** Aligning with personal health ambitions
- 🧘 **Class Environment:** Matching energy and vibe preferences
- ⌚ **Workout Time:** Recommending the perfect time to move
- ❤️ **Favorite Activity:** Highlighting top workout choices
- 💡 **Motivation:** Connecting through personal reasons to stay active

Key data from user surveys and purchase history drive personalized experiences and smarter engagement

Tracking the Impact of Personalized Recommendations

- **Click-Through Rate (CTR):** % of people who click on the recommended classes
- **Conversion Rate:** Percentage of recommendations that lead to a class sign-ups.
- **Adoption/Take Rate:** Measures if users attend the recommended classes.
- **Engagement on the App:** How long the user spends on the app.
- **Class Rating:** User Feedback

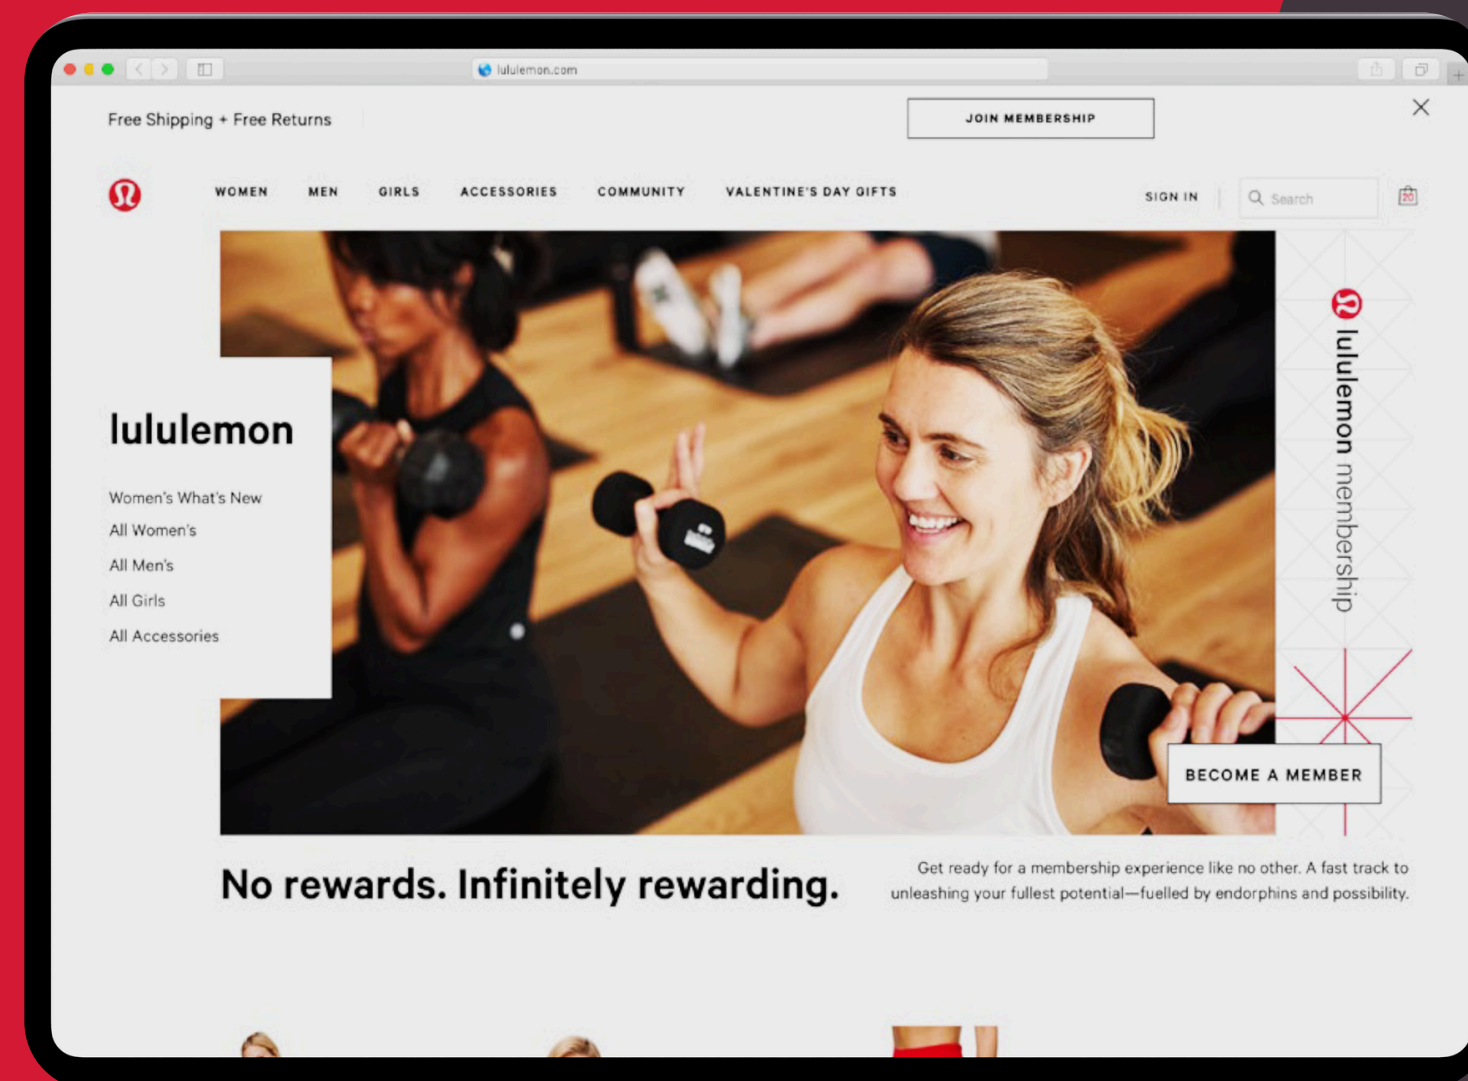

Further Improvements and Next Steps

Next Steps:

- **Progress Tracking:** Let users see their achievements and progress over time, motivating them to stay active and reach their goals.
- Look into introducing more features like loyalty rewards or group classes.
- Add features like badges, leaderboards, or monthly winners to make engagement more fun.
